

MUGISHO MUTARUSHWA Stephan

Software Engineer

✉ mugisho.stephan@a2sv.org ☎ +250792899512 📍 Kigali, Rwanda 🔗 LinkedIn 🐙 GitHub
🔗 Portfolio

👤 PROFILE

Result-oriented Software Engineering graduate with a strong foundation in programming, algorithms, and data structures. Quick to learn, adaptable, and eager to contribute through internship or full-time opportunities while growing professionally

🎓 EDUCATION

BSc in Software Engineering

02/2021 – 09/2025

Université Libre des Pays des Grands lacs (ULPGL),

Goma, DRC

- Relevant Coursework: Programming Fundamentals, Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems, Computer Networks, Computer Architecture, Web & Mobile Development.

🧠 SKILLS SUMMARY

- Languages : Javascript, Typescript, Python, Golang.
- Frameworks: Node.js, Nest.js, React.js, Express.js.
- Tools: Git, GitHub, Docker, Postman, Swagger, Jest, TypeORM, Prisma, Sequelize, VS Code
- Platforms: Linux, REST APIs, PostgreSQL, MySQL, MongoDB, Firebase, Render, Vercel
- Soft Skills: Problem-solving, Algorithmic thinking, Clean code mindset, Team collaboration, Communication, Fast learner

📁 PROFESSIONAL EXPERIENCE

Backend Developer Intern

12/2025 – Present

SOLVIT AFRICA

Kigali, Rwanda

Currently engaged in a backend development internship, contributing to the design and implementation of scalable and production-ready backend systems. Key responsibilities include:

- Built multiple **production-ready backend projects** using **Express.js** and **NestJS**
- Developed secure REST APIs with **JWT authentication, RBAC, and validation pipelines**
- Designed database schemas and implemented **CRUD operations and relationships**
- Integrated **file uploads, background tasks, and caching**
- Implemented **testing strategies (unit & E2E)** to ensure API reliability
- Containerized applications using **Docker** and deployed them to cloud platforms
- Collaborated using **Git/GitHub** following best practices

Backend Developer Intern

09/2025 – 11/2025

HNG-Tech

Remote

Participating in an intensive, project-driven backend development internship through **HNG Tech**, where I collaborate with global peers and mentors to build real world software solutions, sharpen my backend skills, and contribute to scalable backend applications.

FullStack Developer

07/2025 – 10/2025

Bittwok Technologie Ltd

Kigali, Rwanda

As a FullStack Developer at Bittwok Technologies, I contribute to building and optimizing MERN stack projects.

- Designed and implemented caching mechanisms to enhance website performance and scalability.

- Developed secure API access by integrating JWT authentication within Node.js/Express services.
- Collaborated with senior developers on MERN-based projects, improving system reliability and strengthening my skills in React, Node.js, and database management.

TRAINING / COURSES

Africa to Silicon Valley(A2SV)

02/2025 – Present

Software Engineer

Remote

Selected for a highly competitive, intensive software engineering program focused on advanced data structures, algorithms, and real-world problem solving. Received hands-on mentorship and rigorous technical training aligned with global industry standards. Currently specializing in **backend engineering with Go (Golang)**, focusing on scalable API design, performance optimization, and distributed systems fundamentals.

United Students Developers (USD)

07/2025 – 09/2025

Backend Developer

Remote

Successfully completed an intensive coding academy program focused on backend and full-stack software development. Gained hands-on experience building real-world applications, collaborating in team-based environments, and applying practical problem-solving skills to deliver scalable and maintainable solutions.

PROJECTS

Code-Interview-Practice-Platform

01/2026 – Present

API-Code-Interview-Practice-Platform

Currently working on a full-stack project using **NestJS** as the backend framework. The project is a coding practice platform inspired by **LeetCode** and **Codeforces**, designed to help users practice and improve their problem-solving skills. Through this project, I am strengthening my backend expertise by implementing **cron jobs**, **event-driven architecture**, **WebSockets**, **Redis caching**, and other advanced backend concepts.

E_Commerce API

10/2025 – 12/2025

Developed a backend **e-commerce application** using **TypeScript**, **Node.js**, and **Express.js**, focusing on building secure and scalable REST APIs. The project includes product management, user authentication, order processing, and database integration, with an emphasis on clean architecture, data validation, and API security.

CERTIFICATES

- Software Development Training Certificate — USD 
- Backend Development Internship — HNG Internship (Cohort 13) 
- Introduction to Python for Data Science 
- Introduction to AI Agents
